Synthetic Turf International

I have been a long time user of STI products and have enjoyed an STI putting green at my home. Although STI is probably best recognized for its state of the art, cross stitched nylon putting surface, I required a surface that would realistically handle shots hit in from longer distances. When my sons and I practice at home, it is the placement shots that we focus on. Being the Professionals you are, STI encouraged me to install the multi colored, polypropylene, sand filled putting surface as it would best serve my needs and handle longer shots realistically.

We are extremely pleased with the putting green STI installed. It is a total short game facility with fringe, burms and bunkers, lawn turf and hitting stations. It affords me and the Professionals that I teach the ability to practice all of our key shots and to putt as well. The E Z Tee mats give a realistic feel at impact and have a great looking, natural appearance.

I have been a Satisfied Customer of STI for many years and was honored to be asked to speak at your 2005 Distributor Conference. Bill, all of my dealings with STI, from your installers to sales representatives have been rewarding. Quality products, Industry knowledge, customer service and attention to detail is what sets STI above the rest. Congratulations to the entire team.

All the Best,

Jim McLean
